### AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

#### Listing of Claims:

1. (Previously Presented) A disposable absorbent article for wearing on or about a lower torso of a wearer for receiving bodily exudates, the disposable absorbent article comprising:
  - a topsheet,
  - a backsheet joined with the topsheet;
  - an absorbent core disposed between at least a portion of the topsheet and the backsheet;
  - an acceptance element disposed adjacent to a body surface of the absorbent core, wherein the acceptance element comprises one or more apertures each having an effective aperture size of between about 0.2 square mm to about 2.5 square mm; and
  - a fecal storage element disposed between at least a portion of the acceptance element and the absorbent core, wherein the fecal storage element is separate from the absorbent core, the fecal storage element having a compressive resistance of at least about 70%.
2. (Previously Presented) The disposable absorbent article of claim 1, wherein the acceptance element has an effective open area of at least 30%.
3. (Previously Presented) The disposable absorbent article of claim 1, wherein the topsheet is selected from the group consisting of: a porous foam, a reticulated foam, an apertured plastic film, a woven web of natural fibers, a nonwoven web of natural fibers, a woven web of synthetic fibers, a nonwoven web of synthetic fibers, a woven web comprising natural and synthetic fibers, and a nonwoven web comprising natural and synthetic fibers.

4. (Original) The disposable absorbent article of claim 1, wherein the acceptance element comprises a portion of the topsheet.
5. (Currently Amended) The disposable absorbent article of claim 1, wherein the storage element includes a macro-particulate structure comprising a multiplicity of particles having a size of between about 1 mm in diameter and about 10 mm in diameter.
6. (Original) The disposable absorbent article of claim 5, wherein the particles are absorbent.
7. (Original) The disposable absorbent article of claim 5, wherein the particles are non-absorbent.
8. (Canceled)
9. (Canceled)
10. (Previously Presented) A disposable absorbent article for wearing on or about a lower torso of a wearer for receiving bodily exudates, the disposable absorbent article comprising:
  - a liquid pervious topsheet;
  - a liquid impervious backsheet joined to the topsheet;
  - an absorbent core disposed between at least a portion of the liquid pervious topsheet and the liquid impervious backsheet,
  - an acceptance element disposed adjacent to a body surface of the absorbent core, wherein the acceptance element has an effective open area of at least 30%;
  - and

a fecal storage element disposed between at least a portion of the acceptance element and the absorbent core, wherein the fecal storage element is separate from the absorbent core, the fecal storage element having a compressive resistance of at least about 70%.

11. (Previously Presented) The disposable absorbent article of claim 10, wherein the liquid pervious topsheet is selected from the group consisting of: a porous foam, a reticulated foam, an apertured plastic film, a woven web of natural fibers, a nonwoven web of natural fibers, a woven web of synthetic fibers, a nonwoven web of synthetic fibers, a woven web comprising natural and synthetic fibers, and a nonwoven web comprising natural and synthetic fibers.
12. (Original) The disposable absorbent article of claim 10, wherein the acceptance element comprises a portion of the liquid pervious topsheet.
13. (Canceled)
14. (Canceled)
15. (Currently Amended) The disposable absorbent article of claim 10, wherein the storage element includes a macro-particulate structure comprising a multiplicity of particles having a size of between about 1 mm in diameter and about 10 mm in diameter.
16. (Original) The disposable absorbent article of claim 15, wherein the particles are absorbent.
17. (Original) The disposable absorbent article of claim 15, wherein the particles are non-absorbent.
